

Oakland Steiner School

Oakland Steiner School is an independent Waldorf school grounded in the philosophy and methods of Rudolf Steiner. Founded in 1989, the 34,000 SF school sits on a 7+ acre urban site that contains the historic Stiles School. Constructed in 1929 the Stiles School served public education for sixty years and now carries a new vision of our children's education into the future. The teachers, staff, board and parents of OSS retained the services of Sunstructures Architects to guide a master planning process into that future. A series of collaborative worksessions have generated several future scenarios that will be blended into a single conceptual vision that will allow smaller annual phased projects to be carried out by the School as funding becomes available.
